

INDEX

A

ability to bear risk, 129
accounting risk, 160
accredited investor, 4
actively managed funds, 119
active management, 118
active portfolio management, 91
activist shareholder, 46
altcoin, 55
alternative investment, 1
anchoring and adjustment bias, 145
angel investing, 24
asset-backed token, 55
attribution analysis, 103
availability bias, 147

B

backfill bias, 15, 49
backwardation, 41
bank, 115
base-rate neglect, 143
belief perseverance, 142
best-in-class, 134
beta, 98, 160
blockchain, 54
bond mutual funds, 119
brownfield investments, 35
build-operate-transfer (BOT), 34
buy-side firms, 118

C

capital allocation line (CAL), 72, 88

capital asset pricing model (CAPM), 98
capital call, 11
capital commitment phase, 11
capital deployment phase, 12
capital distribution phase, 12
capital market line (CML), 90
carried interest, 4
catch-up clause, 5
central bank digital currency (CBDC), 56
centralized exchange, 58
certainty overconfidence, 149
characteristic line, 96
clawback provision, 5
closed-end funds, 119
Code of Ethics, 178
cognitive dissonance, 142
cognitive errors, 141, 154
co-investing, 3
committed capital, 4
commodities, 2
commodity ETF, 40
commodity trading adviser (CTA), 40
composite, 218
confirmation bias, 143
consensus protocol, 54
conservatism bias, 142
contango, 41
convertible arbitrage fixed income, 47
core-satellite approach, 133
correlation, 75
covariance, 75
credit risk, 159
cryptocurrency, 55
cryptocurrency coin trusts, 59
cryptocurrency exchange-traded products, 60
cryptocurrency futures contracts, 60
cryptocurrency hedge funds, 60
cryptocurrency stocks, 60
cryptography, 53
cyber risk, 159

D

- deal-by-deal waterfall, 5
- decentralized exchange, 59
- decentralized finance (DeFi), 60
- defined benefit pension plan, 116
- defined contribution pension plan, 116
- delta, 161
- derivatives risks, 161
- digital asset, 53
- digital assets, 3
- direct investing, 3
- direct lending, 26
- direct listing, 25
- discretion, 219
- distressed debt, 2, 26
- distressed/restructuring, 46
- distributed ledger, 53
- distributed ledger technology (DLT), 53
- diversifiable risk, 91
- diversification, 162
- diversification ratio, 114
- downside risk, 161
- dry powder, 4
- duration, 160

E

- early-stage financing, 24
- efficient frontier, 81
- either-or fees, 14
- emotional biases, 142, 154
- endowment, 115
- endowment bias, 150
- engagement/active ownership, 134
- engagement/active ownership investing, 134
- equity hedge fund strategies, 46
- ESG integration, 134
- european waterfall, 5
- event-driven strategies, 46
- exchange-traded fund (ETF), 40

exchange-traded funds (ETFs), 120
exchange-traded note (ETN), 40
excusal right, 4
execution step, 114
expansion venture capital, 24

F

factor loading, 94
factor sensitivity, 94
fair value hierarchy, 13
farmland, 2
feedback step, 115
fidelity bonds, 163
financial risk, 159
firm-specific risk, 91
foundation, 115
founders class shares, 14
framing bias, 146
full-service asset managers, 118
fundamental growth, 46
fundamental long/short, 46
fundamental value, 46
fund investing, 3
fund-of-funds (FoF), 48

G

gamma, 161
gate, 14
general fixed income, 47
general partner (GP), 4
global minimum-variance portfolio, 81
governance token, 56
governmental risk, 159
greenfield investment, 34

H

halo effect, 151
hard hurdle rate, 5
hedge funds, 3
herding behavior, 150
high-water mark, 5, 45
hindsight bias, 144
historical data, 75
home bias, 151
hurdle rate, 5
hyperbolic discounting, 149

I

illusion of control bias, 144
illusion of knowledge, 144, 149
impact investing, 134
incentive fee, 4
index funds, 119
indifference curve, 71
individual investors, 115
infrastructure, 2
infrastructure investments, 34
initial coin offering (ICO), 56
institutions, 115
insurance companies, 115
investment companies, 115
investment constraints, 129
investment policy statement (IPS), 114, 127

J

J-curve effect, 12
Jensen's alpha, 105

L

later-stage financing, 24
legal and regulatory constraints, 130
legal risk, 159

- leveraged buyout (LBO), 2, 23
- leveraged loan, 26
- limited partnership agreement, 4
- limited partnerships, 4
- liquidity, 129
- liquidity risk, 159
- load funds, 119
- lockup period, 14, 47
- longevity risk, 160
- loss-aversion bias, 148

M

- M² alpha, 104
- macro strategies, 47
- managed futures, 47
- managed futures fund, 40
- management buy-in (MBI), 23
- management buyout (MBO), 23
- management fee, 4
- market model, 94
- market neutral, 46
- market portfolio, 89
- market risk, 91, 159
- market risk premium, 90
- master-feeder structure, 48
- master limited partnership (MLP), 4
- meme coin, 56
- mental accounting bias, 145
- merger arbitrage, 46
- mezzanine debt, 26
- mezzanine-stage financing, 24
- miner, 54
- minimum-variance frontier, 81
- minimum-variance portfolios, 81
- minority equity investing, 24
- model risk, 160
- money market funds, 119
- money multiple, 12
- mortality risk, 160
- mosaic theory, 191

most-favored-nation clause, 4
M-squared (M^2), 104
multi-boutique firm, 118
multifactor models, 93
multiple of invested capital, 12
multistrategy, 47
mutual funds, 115, 116

N

natural resources, 2
negative screening, 134
net asset value (NAV), 119
no-load funds, 119
nondiversifiable risk, 91
non-financial risks, 159
nonfungible token (NFT), 56
notice period, 14

O

open-end fund, 119
operational risk, 159
opportunistic strategies, 47
overconfidence, 144
overconfidence bias, 149

P

passive investment strategy, 91
passive management, 118
performance evaluation, 103
performance fee, 4
permissioned network, 54
permissionless network, 54
planning step, 114
political risk, 159
pooled investments, 119
portfolio companies, 23

- portfolio perspective, 113
- positive screening, 134
- prediction overconfidence, 149
- preferred return, 5
- pre-seed capital, 24
